Ninh Hoang Khai

FRESHER FRONTEND DEVELOPER

0945-772-109 nhkkhaii@gmail.com https://nhkkhaii.super.site

OVERVIEW

With a strong passion for software development, I have done 4 projects during my university years, spending more than 4 months working in a real environment. After 2 years of serving the Fatherland, I spent 3 months of internship to reintegrate into work. In the shortest time, I want to become a Senior Full-stack Developer.

EDUCATION

The Degree Of Engineer Information Technology | 2018-2022

Nam Can Tho University

- GPA: 3.5 / 4.0
- English: Basic communication

TECH SKILLS

Frontend

ReactJS (TypeScript), Redux, Bootstrap, Ant Design

Backend

Spring Boot (Java), Microservice, C#, Starling (ActionScript)

Database

SQL (MySQL, PostgreSQL), NoSQL (MongoDB)

SOFT SKILLS

For Work

TeamWork

For Personal

Try Hard, Research, Time Management

WORK EXPERIENCE

INTERN FULLSTACK DEVELOPER

FPT IS *02/2025 - Present*

During my time at the company, I contributed to the development of projects such as:

- Chronic disease examination system: Data design adheres to **FHIR HL7** medical standards; system architecture is **microservice**, utilizing Spring Boot and **PostgreSQL**. I developed a dashboard interface using **ReactJS (TypeScript)** with **Redux** for data visualization.
- Key responsibilities:
  - Primary role as a developer.
  - Participating in system development.
  - Optimizing code and database, along with creating functions and processes.

GAME DEVELOPER

VIETGAME *10/2022 - 02/2023*

During my time at the company, I contributed to the development of game systems such as:

- Piggy:

- Description: Piggy is a game designed for user entertainment, featuring a spin-and-win mechanic for in-game gold.
- Key responsibilities:
  - Primary role as a developer.
  - Set up connections to exchange data seamlessly between the server and the client.
  - Perform system and code optimization.
  - Developed game interfaces and effects using **Starling (ActionScript)**, based on designer's sketches.

PROJECTS

FRONTEND DEVELOPER *9/2022*

Personal Portfolio

https://nhkkhaii.github.io/portfolio/

This is a website that proves an individual's ability, built with **ReactJS** combined with **Bootstrap**

FRONTEND DEVELOPER, DATABASE MANAGEMENT *4/2022 - 6/2022*

KaiSneaker

https://github.com/nhkkhaii/KaiSneaker

This is a website that sells items related to modern sneakers.

Key responsibilities:

- Build interface and handle actions using **ReactJS**
- Connect with Backend API to build data-related actions
- Build Database using **MySQL**

BACKEND DEVELOPER *9/2021 - 12/2021*

CinemaNHK

https://github.com/nhkkhaii/CinemaNHK

Programming a movie ticket booking application. The application is used to order movie tickets at home and manage employee information as well as tickets for cinemas.

The application is programmed in **C#**, **SQL Server**, and is used **DevExpress** to build the interface on the Microsoft Visual Studio platform.

BACKEND DEVELOPER *9/2021 - 12/2021*

Project Management

https://github.com/nhkkhaii/QLDA

Construction project management application programming. Application used to manage the details of a project.

The application is programmed in **C#**, **SQL Server** and is developed on the Microsoft Visual Studio platform.
